

Teaching geography from yesterday to tomorrow: the challenges ahead

Contenu sous forme de paragraphes

2022 IGU (International Geographic Union) - CGE (Commission on Geographical Education) International Conference

Organized by the ESO (Spaces and Societies) laboratory of Rennes 2, in collaboration with the INSPÉ (National Institute of Teacher Training) of Brittany

Researchers in geographic education, teacher educators and teachers from all over the world are invited to participate in this conference.

The organizing committee intends to deepen the knowledge on the major curricular crisis that geography experienced at the turn of the 20th century. Geographers had to reaffirm the usefulness and legitimacy of the knowledge taught in the discipline, which led to curricular renewals, changes in teaching practices and the emergence of new theories.

Topic 1 The challenges of the curriculum from yesterday to tomorrow

Topic 2 Geography tools: between tradition and renewal

Topic 3 Teacher training: new challenges
