

Soft and Sustainable Mobility Day on the Villejean Campus

While studying and living in Rennes, our students will undertake a wide variety of activities each week, most of which involves travel: going back and forth to campus, practicing sports, shopping, going out in the evening and more. In order to facilitate this process and help our students save money and improve the environmental impact of their journeys, we're organizing plenty of great initiatives on Thursday September 22nd, including: a bike exchange, Bicycode engraving, bike repair workshop...

Second-hand bicycle market

- Bicycle drop-off: 8-10am
- Purchase of bikes : 10am-4pm
- Money or bike pick-up: 2pm-4pm

Sale/purchase of used bikes: All are welcome to come and sell their old bikes to students who have recently arrived in Rennes!

Interested sellers can drop their bikes off and Rennes 2 organizers will sell it for them without commission (price fixed according to the condition of the bike on the advice of the organizers). The organizers reserve the right to refuse any bike that is not safe enough to be put back on the road.

Engraving of anti-theft codes on bicycles

- By the organization *Rayons d'action*
- 10am-4pm in front of Erève

Students and personnel are encouraged to come and have their bikes engraved to be able to find it more easily in case of theft (and to dissuade the ill-intentioned).

Identification required

Bicycle self-repair workshop "*La roue libre*"

- By the student organization Ar Vuhez
- 1pm-4pm - Bicycle workshop (near the stairs of building B)

The organization also lends students necessary tools and advises them on how to best maintain and repair their bikes. They also can find used or new parts at a low price.

Transport operators

The STAR (bus and metro operators), Breizh Go (bus), SNCF/TER and Citiz Rennes Métropole networks will be present: get information on Korrigo cards, subscription purchases, PDM subscriptions, Pass Mobilité...

Let's go for the "*Tous mobil'acteurs*" challenge!

From today until October 2nd, we will once again be involved with Rennes Métropole in the Tous Mobil'acteurs challenge. The objective is ambitious but within our reach: to cover the distance between the Earth and the Moon by walking, cycling, public transport, carpooling or carsharing!

Participation is via the Mobilacteurs application available on the IOS and Android store.

It is possible to participate alone, but this activity is more fun with several people, so call your friends and create a team! Everyday trips made by walking, cycling, public transport, carpooling and carsharing, during the day, evening or weekend earns points, allows one to pass levels, and challenge colleagues, friends and other companies involved in the challenge.

Those who enter will be eligible to win gifts.

And to encourage our staff to to participate in the Mobility Day, we're organizing:

The Staff Bike-Bus

On this day, staff are encouraged to come to work by bike and spend a friendly moment with colleagues. The regulars will be able to advise the beginners on the route to take and the attitude to follow, with a special treat of breakfast offered upon arrival.
