Rennes 2 University

# Department of Visual Arts

Description succinte

Our department offers students a broad education in the field of visual arts, emphasizing a diversity of approaches, creative experimentation, as well as general art culture. We also strive to provide students with an important capacity to adapt in a constantly changing cultural, social and professional environment.

We aim to provide a twofold expertise as foundation for a practical and theoretical production:

- practical, because that production is shown through tangible realizations and experimentation (research, in art, goes hand in hand with the practice),
- theoretical, in that the production makes sense within the artwork itself to both the viewer and the creator (theory is thus put to the test of practice).

## Dedicated Spaces

As part of their studies, our students (from Year 2 and up) gain access to studios equipped for the practice of various arts: engraving, screen printing, analog photography and shooting set.

Students are also able to exhibit their work in the dedicated Espace [M] and organize showings.

- See this page for more information on dedicated spaces for the arts.

## Bachelor's Degree

Visual Arts Bachelor’s Degree

## Master's Degree

Visual Arts Master’s Degree

Digital Arts Computing Master’s Degree

Design Master’s Degree: Design and Social Sciences pathway

Digital Humanities Master’s Degree
