

Exhibition of Zineb Sedira

Contenu sous forme de paragraphes

Zineb Sedira's works are the expression of a decentralized view of history and open to multiple interpretations driven by the notion of witnessing and the importance of narrative. The concept of the exhibition emphasizes the different ways in which individual and historical stories can be relayed, preserved for future generations and heard, seen and shared.

The aim of the exhibit is to extend the artist's approach within the exhibition itself in order to highlight its importance by creating a space that will be deployed around a new production.

The programme of events can be found on the website [here](#).
