

## Coronavirus

Contenu sous forme de paragraphes

*A meeting organized as part of the Science Fair, where children will be able to ask questions about the epidemic, followed by an exchange with parents.*

What is corona? Is it the pangolin's fault? How do you catch it? How long does it last, and what does it do? Should we really be afraid of it? ...

Researchers from the University of Rennes Project propose a free and open moment of exchange meant for children (from 6 years old) accompanied by their parents.

### Speakers

- Matthieu Revest, Professor at Rennes 1, Infectious Disease Specialist (Department of Infectious Diseases and Medical Resuscitation - Rennes University Hospital)
- Myriam Chérel, Teacher-researcher in clinical psychology, psychopathology and psychoanalytical clinic at Rennes 2
- Laetitia Belle, Lecturer in Psychopathology and Clinical Psychology (to be confirmed)
