

Declame'FLE Celebration of Francophonie

Contenu sous forme de paragraphes

March is the international month of Francophonie. This year, Rennes 2's Slovakian partners of the Declame'FLE Project invite you to take part in an online celebration of francophobie and women.

"Bringing culture to life and offering viewers the opportunity to travel from home."

For this reason, the organizers of the month of Francophonie have opted for an exclusively online edition in this very special year!

The 2021 edition is also marked by a new twist: the introduction of the concept of "*fil rouge*", the main theme of the edition. This year, women will be honored through portraits that will invite you to travel and discover women, social realities, empowerment, successes and extraordinary journeys.

The program as well as the documents (excerpts and exercises to be read before each workshop) of the different workshops are or will be downloadable on the [DECLAME'FLE padlet](#). The documents for workshop 2 have already been posted on the Padlet, those for the other workshops will be posted in the next few days.
