Rennes 2 University

Sustainability Commitment

Sustainability at Rennes 2

With a student body of 20,000, our university has an important role to play in contributing to the life of the students and community of today and tomorrow which entails reducing our ecological footprint and improving work and study conditions, quality of life and well-being on and off our campuses.

Our Sustainability Plan

A master plan for social and ecological transformations was established by Rennes 2 University, with strategic actions regarding sustainable development and social responsibility.

Its goal is to better ensure a university life that is more harmonious and sustainable with community actors and the city and region, all the while reducing the ecological footprint and improving work and study conditions, and well-being on our three campuses (La Harpe, Mazier, and Villejean).

- **More on the master plan for social and ecological transformations.**
