

Rennes 2 University

Sustainability Commitment

Sustainability at Rennes 2

With a student body of 24,000, our university has an important role to play in contributing to the life of the students and community of today and tomorrow which entails reducing our ecological footprint and improving work and study conditions, quality of life and well-being on and off our campuses.

Read more about our guiding principles and approach [here](#).

Our Sustainability Plan

Following a collaborative process involving staff and student volunteers, an ambitious five-year plan for sustainable development and social responsibility was established. This plan includes 118 actions with a strategic, pedagogical or operational focus, combining sociability, participation, equity and responsibility.

Its goal is to better ensure a university life that is more harmonious and sustainable with community actors and the city and region, all the while reducing the ecological footprint and improving work and study conditions, and well-being on our three campuses (La Harpe, Mazier, and Villejean).
