## GAMEland

Gamification Assets for Multisensorial Educative tools in Language learning using co-creation for addressing Needs and Desires of students

### Project Description

The GAMEland project aims to prepare future university graduates for entry into the European labour market by promoting new innovative educational practices and developing and popularising a model of increasing language competences through a gamification approach.

Gameland will also help develop soft skills through the use of innovative teaching methodologies based on simulations, realistic games and scenarios, which will be closely linked to the authentic labour market situation.
