Rennes 2 University

Rennes 2 University Ranks Among the Top in L’Étudiant’s 2025 Ranking

The Magazine L'Etudiant each year publishes its rankings of the universities with the best bachelor's degree results. In 2025, they ranked 69 French universities according to their success in three-year bachelor's degrees.

In addition to raw success rates, the ranking also considers "added value in university success." This indicator measures how effectively an institution helps students progress.

This strong performance underscores the quality and effectiveness of Rennes 2’s educational framework, which includes:

Qualiopi Certification

The university relies on *Qualiopi* certification, ensuring optimal clarity in its academic offerings. This certification allows students, from the moment they enroll in their first year, to make well-informed choices regarding their educational path—an essential asset for a successful university experience.

Diverse Practical Teaching Methods

From the first year, students benefit from numerous *TDs* (tutorials) and *TPs* (practical work), a teaching approach that strengthens their understanding of subjects and enhances their practical skills. In the second year, although these sessions are reduced, they remain a key component of the curriculum.

Internships in the Third Year for Career Readiness

The university provides internship opportunities, particularly in the third year, to help students gain professional experience and facilitate their transition into the workforce.

The Student Support Center (EAE)

This center offers valuable assistance in understanding university processes and guides students through administrative procedures.

University Library (BU) Workshops

Students can take part in short workshops organized by the university library, helping them improve their study methods. These workshops address key academic skills such as information management and research methodology.

Comprehensive Student Support

The university places great importance on student well-being by providing various support services, including:

- *SVE* (Student Life Service)
- *SSE* (Student Health Service)
- A wide range of cultural and sports activities
- Enhanced support for students with disabilities

These initiatives ensure that students can focus fully on their studies in an environment conducive to their personal and academic development.

Tutoring and the Buddy System

The university offers tutoring for first-year students to help them adjust to university life. Additionally, international students can benefit from a mentorship program through the *Buddy System*, which provides essential support for their integration and well-being.

Personalized Academic Pathways

Rennes 2 offers great flexibility in bachelor’s degree programs, allowing students to tailor their education through cross-disciplinary courses and customizable study options. This enables each student to shape their academic journey according to their interests and career goals.

Encouraging Responsibility and Engagement

The university values student engagement in associative, civic, or academic initiatives (*TSE Ambassadors*). This focus on responsibility prepares students for future professional and social roles.

With this comprehensive support system, the University of Rennes 2 stands as a model of academic success and student guidance, enabling each individual to thrive, complete their studies successfully, and build a solid foundation for their professional future.
