Explore the 2025 Cultural Season at Rennes 2 University

This year's program, designed by our cultural service, brings together a wide range of events—from performances and exhibitions to discussions—focused on innovation, artistic expression, and the sharing of perspectives.

Running from September to December, the season follows the theme of the 2025 Science Festival, *"Intelligence(s),"* highlighting the many ways intelligence—human, technical, and collective—helps us understand and shape the world.

Whether you're curious about art, science, or public debate, this season invites you to explore, connect, and be inspired. Join us and experience the vibrant cultural life of Rennes 2 University.

Find the full program of events on the Culture website of Rennes 2 available [here](#).
