

Digital Resources

Rennes 2 University offers many digital services and equipment for students, teachers, and staff to support education.

Pôle Numérique Rennes Villejean (PNRV)

On the Villejean campus, the digital hub building is home to telepresence rooms, a tele-lecture hall, a fablab, the research institute for innovation and digital society, and classrooms dedicated to digital classes.

Edulab

The Edulab is Rennes 2's fablab (fabrication laboratory). It is a space for digital creation, experimentation, and learning. During the year, students, teachers, and university staff can get together to realize projects or experiment, each person bringing their knowledge and skills.

The fablab is equipped with many tools: a laser cutter, 3D printers, Arduino PROM cards. The Edulab also offers classes, thematic workshops, debates, and exhibitions.

For more information, visit the [Edulab website](#).

Online Libraries

Rennes 2's university libraries offer a selection of online resources, such as digitized works collections and a multimedia digital library.

For more information, see the [libraries page](#).

Computer Labs

Many classrooms equipped with computers are available on all three of our campuses.

They are open to all students from 8 a.m. to 8 p.m. on weekdays to provide access to Windows PCs or thin clients.
